

Ilfracombe - Isolocork on Lime Render

Spray Cork Project Case Study

Project overview

External renovation of an existing lime-rendered residential property in Ilfracombe. The existing finish was prepared and protected before Isolocork spray cork was applied as a continuous textured external finish.

Existing condition

Existing lime-rendered wall before the Isolocork application.

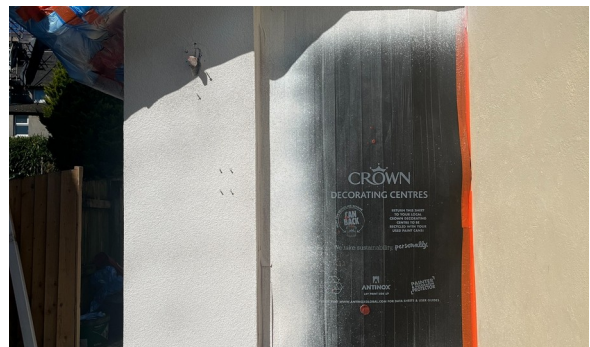

Substrate preparation

Existing lime-rendered surface prepared before coating, with openings and adjoining areas protected.

Application in progress

Openings, roof edges and adjoining surfaces masked and protected while the coating work progressed.

Coating application

Isolocork spray-applied across the prepared wall to form a continuous textured finish.

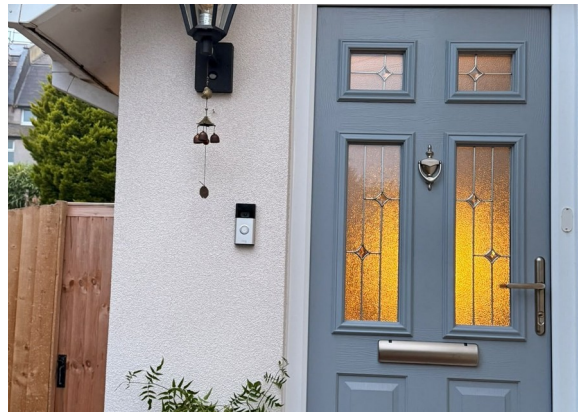

Completed Finish

Ilfracombe - Isolocork on Lime Render

Finished surface

Close view of the completed Isolocork textured finish.

Completed elevation

Completed Ilfracombe elevation following the Isolocork application.

Project summary

This project shows Isolocork applied over an existing lime-rendered property in Ilfracombe. Following preparation and protection of adjoining surfaces, the spray cork system was applied to create a continuous textured external finish.

Location

Ilfracombe, UK

Application

External wall renovation

Existing substrate

Lime-rendered façade

System

Isolocork spray cork
